FINDING BEST FIT COLLEGES

The Princeton Review's mission is clear: to help college-bound students find, get into, and pay for the school that is the best fit for them. During this session, The Princeton Review will discuss finding the best fit college for you while not breaking the bank. This presentation will also go over common hopes and worries that families face during the college application process (including the biggest one: what happens if a student gets into college and cannot pay for it). The fact is that it has never been easier to get into college than it is now and it has never been harder to get into college than it is now.

During this discussion, The Princeton Review will help students and families understand more about the college admissions process, what colleges look for, how and why they're selective, and how students wow them. Also, we will be discussing being a savvy college shopper, looking past the marketing materials to help students find their best fit school. Where you go to college matters. So does finding the best school for you.

Limited Space. EVENTBRITE RSVP RECOMMENDED: [Link coming soon](#)
